EXPERIENCE

01.2023 – now

MULTILOGIN | **SENIOR KNOWLEDGE MANAGER, UX WRITER**

- Manage the Help Center across **5 languages**, covering **1,000+ localized article versions**, and work with Product, Engineering, Design, and Support to keep documentation accurate, clear, and useful
- Lead the Help Center redesign **from concept to implementation**, writing requirements, creating UX mockups, coordinating teams, reviewing the finished work, and analyzing user behavior
- Own product UI copy from creation to release, review **thousands of English UI strings**, and establish and enforce writing standards to keep the interface clear, consistent, and user-friendly
- Create **product demos, GIFs, and interactive guides** to explain features and help users navigate key workflows, including 50+ Arcade videos
- Review sprint changes, select updates with meaningful user impact, and turn them into clear **public release notes** that make sense without internal context
- Coordinate **localization** across the app, website, Help Center, and product communications; improve Crowdin workflows, terminology, translation memories, and localization QA
- Improve documentation discoverability through **SEO and AEO**, using analytics and AI-answer reviews to make content easier to find, understand, and cite accurately
- Improve documentation operations by consolidating platforms, reorganizing knowledge resources, and cleaning up legacy content, including changes that **save approximately $2,400 annually**
- Create and localize **500+ AI chatbot answers**, using customer insights and search analytics to deflect 40% of potential support tickets and achieve 65% customer satisfaction

10.2020 – 01.2023

MULTILOGIN | **TECHNICAL SUPPORT SPECIALIST**

- Helped users **resolve issues** with software, browsers, proxies, networking, and server configuration
- Created and localized **user guides and UI copy**, maintained internal documentation, and trained and onboarded teammates
